- Problem-solving skills

PROFILE

Master's student in Computer Engineering at FCT NOVA, with hands-on experience in software development through academic projects and a professional internship. Familiar with full-stack web development, databases and modern development tools. Built personal projects in Unity (C#), did freelance work and participated in game jams.

EDUCATION

Bachelor's Degree in Computer Engineering 2024-2026
Faculty of Science and Technology, Nova
University of Lisbon

WORK EXPERIENCE

Fiverr 2024
Freelancer in application and game development

- Development of custom software solutions for clients (C, Java, Python) and prototypes for games in Unity (C#).

Legau October 2025 - February 2026
Web developer intern

- Developed the Client Portal for Legau, a multi-tenant web application used by administrators of client organizations within the Legau platform. Enabled self-service management of users, groups, and usage analytics.
- Built full-stack features using Laravel (PHP) for backend services, Nuxt.js (Vue.js) for frontend development, MySQL for data management, and Docker for containerized environments.

PROJECTS

Praying Petals June 2026
Unity, C#

- Created during 2D GAME JAM #REBORN (theme: Invisibility & You are the enemy), a one-week game jam. Published on itch.io.
- Flower shop simulator where you trim flowers, serve clients, and hide from threats - playing as a mantis shopkeeper who is secretly the parasyte.
